

Gainly — Claude Code Work Report

Summary of all AI-assisted development sessions on the project

161 commits

31 merged PRs

~12 days

Apr 21 – May 2, 2026

Branch: kh4leoni/gainly

Week 1 — Foundation & UI Overhaul (Apr 21–23)

INITIAL SETUP (DIRECT TO MAIN)

- Initial commit of the Gainly PWA codebase
- Full UI translation to Finnish
- Refactored program system — separated template programs from coaching programs

MERGED PRS

#	Title
#1	UI refactor: theme toggle, shell polish, RSC crash + hydration fix
#2	Exercise library redesign, descriptions & Finnish exercises
#3	Clients UI redesign + active week toggle for programs
#4	CI setup: GitHub Actions (typecheck, lint, unit tests, build) + Vitest
#5	Client detail page redesign with stats and search dropdowns
#6	Coach dashboard redesign + logo (liikepankki, ohjelmat)
#7	Program builder UI redesign — periods, weeks, workouts, exercises
#8	Client side redesign
#9	Client training UX — per-set targets, notes, history, sync, PWA safe area

Week 1–2 — Logic Fixes & Security (Apr 24–25)

#	Title
#10	Logic fixes and minor UI updates
#11	Remove offline layer, fix workout logging + PR detection
#12	Replace blurry Lucide icons with Phosphor solid icons in tab bars
#13	Active week UX improvements in program editor
#14	Disable public signup, improve coach UX

Standalone security commit: CSP headers, message tampering protection, and auth token bypass vulnerability fixed.

Week 2 — Auth, Branding & Polish (Apr 26)

#	Title
#15	Isolate exercise bank per coach + Finnish translations
#16	Exercise info dialog for clients
#17	UI polish — animations, interactions, client scroll fixes
#18	Replace native browser confirm/select with themed components
#19	Full-width swipe transitions between client tabs

STANDALONE (DIRECT TO MAIN)

- Gainly logo added to login page and sidebar with × separator
- Email invitation flow rebuilt (PKCE, implicit-flow tokens, password setup email)
- Invite flow simplified — dropped custom token RPC, link coach-client immediately
- Password recovery confirm route and update-password page

Week 2–3 — Offline-First PWA (Apr 27–28)

Largest feature block of the project: full offline capability via Dexie (IndexedDB) mirror tables + service worker.

BRANCH: FEAT/OFFLINE-CAPABILITY

- Offline-first workout logging — Dexie mirror tables for set_logs, workout_logs, scheduled_workouts
- Background Sync API (gainly-sync tag) for Android; fallback event listeners for iOS
- Service worker navigation cache fixed (never fired before)
- Prefetch next 5 workouts for offline use
- Global offline indicator bar on all client pages
- iOS Safari layout fixes — slide animations, clip-path, fixed container clipping (multiple iterations)

STANDALONE

- Replace landing page with login redirect + branding update
- Ask for full name on invite accept
- Reliable logo dark/light mode inversion on all devices

Week 3 — Performance Sprint (Apr 29)

#	Title
#20	Drag-and-drop reordering in program editor
#21	Eliminate N+1 queries, reduce Supabase round-trips
#22	React.cache auth deduplication + set Vercel region
#23	Fix getMeCached auth deduplication (phase 3)

Week 3 — Mobile Polish & Fixes (Apr 30)

BRANCH: FIX/MINOR-FIXES

- Sync bar bubble UI, dedup renders, minimum 1 s display, no layout shift
- Coach mobile navbar safe-area inset + bounce animation removed
- Program editor mobile overflow fix
- Exercise info dialog close button always visible on all devices
- PWA home screen icons generated from new Gainly logo (multiple size iterations)
- Logout properly clears session cookies on redirect response
- Motivational quote SSR hydration mismatch fix (random index client-side only)
- iOS Safari black screen on messages view fixed (will-change / GPU layer)
- Smooth collapse animations for all expandable sections

Week 3–4 — Measurements, Skeletons & Competition Tool (May 1–2)

#	Title
#24	Settings panels: client bodyweight/waist tracking, coach editable profile, load 20 messages
#25	Smoother navigation — instant tab feedback, login spinner, page fade-ins
#26	Fire slide animation at click time, not after RSC response
#27	Slide in empty destination instead of stale page content
#28	Route-aware skeleton screens during client tab transitions
#29	Shimmer skeletons + messages slide fix + coach skeletons
#30	Coach chat fills full viewport height
#31	Instant skeleton feedback for Ohjelmoi and Aloita treeni

STANDALONE (DIRECT TO MAIN)

- Forgot password flow + auth security hardening + dashboard stat grid + recent PRs

- Measurements & progress section updates + powerlifting tab
- Kilpailutyökalu (powerlifting competition tool) on coach client page — attempt tracking + total
- PWA: restore last visited page when relaunching from home screen

CURRENT BRANCH: FIX/MESSAGE-BADGE-STABLE (IN PROGRESS)

- Unread message badge on nav bar
- Hide badge when already on messages page
- Sync bar brief green "Synkronoitu" flash on success
- Freeze sync bar display during fade-out (prevents orange flash)
- Mark all messages as read on messages mount
- Force-dynamic rendering on client layout

Summary by Category

Category	Scope
UI redesigns (coach + client sides)	8 PRs
Major features (offline, DnD, competition tool, settings, PWA restore)	8 PRs + direct commits
Navigation & animations (slide, skeleton, fade)	7 PRs
Performance (N+1 elimination, auth caching)	3 PRs
Security & auth (CSP, invite flow, password reset)	2 PRs + direct commits
Icons, branding, mobile polish	4 PRs + direct commits
CI / tests	1 PR
Total merged PRs	31
Total commits	161
